

## METALLIC EPOXY COATINGS - LIQUID

These epoxy coatings create one-of-a-kind floors that are very attractive and extremely easy to maintain. Patterns and designs are only limited by your imagination. Liquid metallic colourants are added to clear epoxy coatings and applied in a thick layer over a primed concrete surface. Additives can be incorporated for enhanced slip resistance with sheen levels available in gloss, satin, and matte.

### *Advantages*

- Unique appearances and patterns
- Impermeable, easy-to-clean surface
- Seamless and joint free
- Low odour during application

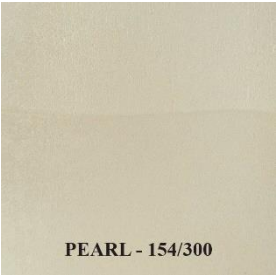

### *Areas of Use*

- Commercial
- Residential
- Retail Stores
- Showrooms
